

List of data needed to select elements photovoltaic system:

- 1) investor – a natural person or a company (if a company, please provide the Tax Identification Number)
- 2) investor contact details (name, surname, telephone number, e-mail address)
- 3) investment address
- 4) number of people in the facility
- 5) roof plan scan (top view)
- 6) spatial location of the plot (should be included in the design). If there isn't, then please mark the north direction on the roof plan or specify the direction north, e.g. north direction of the entrance door
- 7) place of installation of panels:
 - a) on the roof
 - b) on the ground

Questions 8a to 8g concern roof mounting

- 8a) type of building:
 - a) house
 - b) farm building
 - c) industrial hall
 - d) different
- 8b) type of roof covering:
 - a) ceramic roof tile (if tile, please provide manufacturer and name of the roof tiles)
 - b) metal roof tiles
 - c) trapezoidal sheet
 - d) flat roofs (flat roof)
 - e) roofing felt (flat roof)
 - f) other – what?
- 8c) roof dimensions:
 - a) height
 - b) width
 - c) length
- 8d) roof shape:
 - a) flat
 - b) single-slope
 - c) gable

8e) information about the building:

- a) available roof area
- b) roof angle
- c) building height
- d) rafters - spacing
- e) rafters - material: wood, steel

8f) technical data inverter room:

- a) garage
- b) basement
- c) technical room
- d) other - what?

8g) Wiring technical data:

- a) surface-mounted
- b) flush-mounted

9) if the building is already in use, please provide energy consumption for the year or the amount of the average electricity bill in PLN (with an indication for what period e.g. one month, two months)

10) energy supplier

11) power consumption in continuous mode

12) additional lightning protection of the photovoltaic power plant - should it be:

- a) yes
- b) no

13) photovoltaics is to protect electricity consumption for:

- a) central heating
- b) central heating + water heating
- c) central heating + water heating + electronics, household appliances
